Explore a wider variety of eye-catching texts. the subtitle translation function to create bilingual subtitles.6. Easily select the chorus of a song with new one-click function. Hey, I use VivaVideo to edit my videos but a question and problems. 1. Could we make it possible to add advanced speed effects to videos? 2. It crashes the app when I buy something. For example, I asked my dad to buy the subscription and he said yes and it crashes the app. I don't like when it crashes the app, but it could be because he tried to buy it and abruptly crashed the app. 3. When I add music and videos, they don't save at all. Maybe I am a little nit picky about this but when this app shuts down, it shut down every quarter of a sec. 4. Always crashes when I try to open it. 5. There needs to be an option to add animated text, music and photos. 6. There should be an option to trim videos. 7. There should be an option to add animated text to videos. 10. There need to be an option to add animated text, music and photos. 6. There should be an option to add animated text, music and photos. 6. There should be an option to add animated text to videos. 7. There should be an option to add animated text to videos. 10. There should be an option to add animated text to videos. 18. There should be an option to add animated to increase or decrease intensity and contrast. 12. Please make it so we can add more animations to text. So please consider this one and sorry if this is so long So I was downloading almost every video editing app on the AppStore and a lot of them came with free trials just like this one did. I tried just about all of them. Even the "professional polished" looking apps that charge more for pretty much the exact same thing that you can do on here. I purchased the year VIP subscription and I don't regret it. I use several other apps in conjunction with VivaVideo. The things you can do if you try to learn them, are pretty awesome. There are some limitations when it comes to using it on your phone but partially due to the screen size but once I have my iPad running this app, I have a lot of fun and the effects are super cool. I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. And maybe some video filters that have mirroring or even a kaleidoscope view! I'd like to see more of them added. you're looking for a review from someone meticulous about their purchases to sway you into moving forward with the app/subscription: This'll be it. Happy editing. I love viva video! It is so simple to use and you can really make a great video using it. I especially love how it exports as MP4 instead of MOV! Would love to see: 1. BRING BACK ROTATE ALL / APPLY TO ALL when rotating a clip. I import multiple clips and it changes the rotation. If I change the canvas and rotate it how i want it, there is no option to rotate all the clips that takes WAY too long!!! Please bring that back. 2. Make it so we can change the LENGTH of the transition. If I use cross fade, it cuts off the sound from the first clip wayyy too early. I can never use cross fade if there's spoken word for the length of the transition. and I love that. 3. ADD AN ADJUSTABLE SMOOTHING SKIN FILTER!!! Sometimes I don't want to change that it exports to MP4 even if you're importing as .MOV! That's my favorite thing about this app! UPDATE: I don't think I'm having the same issues as before, so thanks! For that.
