New tools in ArcGIS Online include overlap layers to combine two or more layers into a single layer; strengthened critical point analysis; and data enrichment resources to get information about people, places, and companies in a specific area or driving time. Esri gave entile any customer organization that has ArcGIS for Desktop (Basic, Standard, or Advanced) to receive an ArcGIS Online subscription. Working with others who have shared this passion, we have been encouraged by the vast possibilities of GIS. Today, our trust in GIS is built on the belief that geography counts-connects our many cultures and societies and influences our way of life. It includes ArcGIS GeoEvent Processor for Server, a new ArcGIS for Server extension that allows users to access live data streams. Many third-party applications are also allowed to use ArcGIS Server services. Numerous third-party applications are licensed to use ArcGIS Server extensions allow to be deployed as Web services. ArcGIS Server is typically deployed on-premises within the organization's service-oriented architecture (SOA) or off-premises in a cloud computing environment.ArcGIS Server provides GIS mapping and functionality through ArcGIS Online for Web applications and external clients, such as ArcGIS Desktop, ArcLogistics, ArcGIS Viewer, ArcGIS Explorer, ArcGIS Explorer Online, ArcGIS Explorer for Flex, ArcGIS Mapping for SharePoint, Business Analyst Online (BAO), and applications ArcGIS for iOS or BAO for iOS.
